## Some of the projects I worked on

- [SportEasy](#): Features shipping, technical debt tackling, bug fixing and codebase modernisation as a Django Senior Software Developer at [SportEasy](#).
- [Neve](#): As a Lead Software Developer, bootstrapping of the [Neve](#) e-learning platform, so that hits the mark for its first pilot test.  
I chose to use the productivity given by Django and Next.js to deliver it in due time
- [Cloud Solar](#): Django and React Lead Software Developer for [Cloud Solar](#), an IoT platform that allow businesses to manage their solar panels fleet
