Plant Nest - Online Plant Store

Plant Nest is an online platform built using Laravel, where users can purchase plants and accessories. This README provides an overview of the project and its features.

Features

- Browse a variety of plants and accessories.
- Add products to the cart and proceed to checkout.
- Admin panel for managing products, blogs, and testimonials.

Getting Started

1. Clone the repository: `git clone https://github.com/yourusername/plant-nest.git`
2. Navigate to the project directory: `cd plant-nest`
3. Install dependencies: `composer install`
4. Configure environment settings: Copy `.env.example` to `.env` and set up your configurations.
5. Generate an application key: `php artisan key:generate`
6. Run migrations and seeders: `php artisan migrate --seed`
7. Start the development server: `php artisan serve`

Usage

- Explore the plant store on the website.
- Admins can access the admin panel at `/admin` and log in using admin credentials.
- Manage products, blogs, and testimonials from the admin panel.

Contributing
